

How to Resolve SAS Font Log Warning

SASROOT =/apps/sas9.1.3

Steps:

1. In /SASROOT create a directory fonts
2. cd in to font
3. Using vi create a file SAS (upper case important)
4. In file SAS add the following line:

```
SAS.SystemFont: -misc-fixed-medium-r-semicondensed--12-120-75-75-c-0-iso8859-1
```

5. vi /apps/sas9.1.3/sasv9_local.cfg and add at the bottom:

```
-set XAPPLRESDIR /apps/sas9.1.3/fonts
```

6. Ensure that the SAS file has 744 permissions and the fonts dir 755

This concludes eliminating warning messages in SAS LOG regarding fonts not found.
