

New Java 7, Consideration for Upgrade

For SAS Foundation install and clients, do you wish to use the Java 7 release? It is not necessary that you do upgrade, but if you do, read more information here: <http://support.sas.com/kb/49037.html> and note that some of the SAS modules are not ready for Java 7. SAS still is using 7_15 and not the latest for the Java 7.
