

## Redirect All Traffic to Secured Ports:

Follow the steps shown below to ensure that all web traffic is routed to the secured ports (https protocol):

1. Edit the `<../config>/Lev1/Web/WebServer/conf/httpd.conf` and un-comment the following lines:

```
# RewriteEngine On
```

```
# RewriteCond %{HTTPS} off
```

```
# RewriteRule ^/(.*) https://your-machine-name:port-number/$1 [L,R=permanent]
```

As

```
RewriteEngine On
```

```
RewriteCond %{HTTPS} off
```

```
RewriteRule ^/(.*) https://your-machine-name:port-number/$1 [L,R=permanent]
```

2. Save file and re-start the web server
